

# TL-9 STABILIZER

**“Maximizing Stability”**

The TL-9 Stabilizer was designed by firefighters for firefighters! It allows you to perform a lift with your hydraulic spreader in a quick, efficient, and stable manner.

**The TL-9 Stabilizer allows for a rapid lift with maximum stabilization**

- Constructed with ½ inch AS-36 Steel
- Compression tested to 50 tons
- Works with all hydraulic spreader units
- Custom made to fit your spreader within an 1/8 of an inch
- Rapid set-up and operational time, user friendly, extremely efficient, safe and simple to operate
- Solid construction features provide for unparalleled lateral stability when compared to any other set up of this nature
