

**PURPOSE:**

To define the best practices for implementing and using *Hygenall® FieldWipes™*

**POLICY:**

*Hygenall® FieldWipes™* should be used to decon your skin after being exposed to any contaminants or toxins.

**GENERAL:**

- Use for On Scene Decon after firefighting, training, exposure to any IDLH atmosphere or being exposed to any contaminants/toxins.
- 45 wipe canister- 1. Remove lid, 2. Make small hole in Freshness Seal, 3. Locate end of wipe in the center of roll, 4. Thread corner of wipe through lid, 5. Replace lid and dispense wipes at a sharp angle, 6. Close dispensing cap tightly after use.

500 wipe dispensers- \*Do not remove roll from plastic bag. 1. Pry off lid, 2. Make small hole in top of bag and place back in bucket or wall dispenser, 3. Pull wipe from center of roll and feed through the lid. 4. Tightly replace lid, 5. After done only leave a small part of wipe exposed to plug the hole. Note: for prolonged life when not in use, pry lid off and tape bag sealing it from air and replace lid.

- Use daily on hands, arms, face, neck and other exposed areas of skin. Rinsing with water is not required. For maximum effectiveness, use second wipe followed by rinsing with water and discard.
- For external use only. Keep out of eyes.
- Follow all firefighting and training with a shower using *Hygenall® FieldWash™*.
- Safe to use on equipment i.e.: Mask and MMR but we recommend using NFPA 1851 compliant *ToxOff™* for SCBA mask, MMR and Equipment.
