

# FEATURES & BENEFITS

AIR-PAK™ X3 PRO

| FEATURES                       | BENEFITS   |
|--------------------------------|--|
| New Harness Materials          | Offers greater resistance to water absorption, helping to minimize contamination;<br>Provides improved durability to withstand the rigors of the fireground;<br>Enhances SCBA ergonomics to reduce user fatigue and maximize comfort |
| Removable Harness              | Easy-to-remove harness allows for cleaning and gross decon, while also improving serviceability  |
| New Shoulder Harness Design    | Improves the ease of donning the SCBA and minimizes pressure points to help reduce user burden   |
| Natural Articulation           | Promotes greater range of motion to the firefighter, while transferring weight to the hips for a more balanced load;<br>Minimizes wear and tear commonly found with mechanical articulation  |
| Superior Breathability         | Offers minimal breathing resistance to help reduce user burden and improve operational efficiencies  |
| Redundant Safety Features      | Affords firefighters peace of mind knowing that the SCBA is going to perform in the toughest environments;<br>Ensures reliability and performance of the SCBA to ensure the safety of firefighters                                   |
| New Buckle Design              | Provides firm hold to prevent inadvertent loosening of shoulder and waist straps, maintaining secure fit of SCBA on the firefighter  |
| Bluetooth® Enabled Electronics | Supports wireless connectivity between devices for improved configurability, data transmission/retrieval, firefighter safety and fireground accountability   |
| Electronic PAR (ePAR)          | Provides wireless, bi-directional communication between the firefighter and incident command (I/C) to improve fireground accountability and communications   |
| System Integrity Alarm         | Visual and audible alert to notify SCBA wearer and incident command (I/C) of impending electronics degradation due to elevated temperature   |

| FEATURES                    | BENEFITS   |
|-----------------------------|--|
| High Flow Alarm             | Visual and audible alert to notify incident command (I/C) of a high flow condition from a firefighter's SCBA during a full-alarm PASS activation (i.e. heavy breathing, free flow, etc.) |
| No Flow Alarm               | Visual and audible alert to notify incident command (I/C) of a no flow condition from a firefighter's SCBA during a full-alarm PASS activation   |
| Integrated RFID Tags        | Provides local storage of SCBA information that can be wirelessly interrogated for asset tracking  |
| Reflective Webbing          | Delivers heightened visibility of the SCBA when operating in low light conditions, improving safety and accountability on the fireground   |
| "Buddy" Lights              | Optimally positioned on the backframe to provide a 360° view of the firefighter's air pressure and PASS status   |
| Integrated Drag Rescue Loop | Sewn into SCBA harness and attached to backframe, providing a rated pull strength of 1000 lbs to assist with rescuing a downed firefighter   |
| Aluminum Alloy Backframe    | Lightweight design utilizing aircraft grade aluminum for added durability to withstand the rigors of the fireground  |
