Hygenall[™] *FireFighter*

Cleaning and Decon

Why Hygenall FireFighter Safety Products?

BE CANCER AWARE!

Hygenall makes science based cleaning and decontamination safety products for people that fight fires.

For over a decade, Hygenall Corporation has invested millions of dollars, more than any research institute, to understand how to safely decontaminate people and equipment from a full-spectrum of chemicals. Hygenall cleaning and decon products do more than regular soap-based cleaners to help keep firefighters safer from occupational diseases such as cancer, and help prevent bringing toxic substances home to their families. With patent pending technologies that are improvements on decontamination science originally developed by NIOSH, we have converted groundbreaking science into the safest range of cleaning/decontamination products that completely replace all other soaps and wipes, specifically for the fire service.

We have focused our four United States based manufacturing facilities and laboratories to provide a single brand solution to meet the needs of a customer base that spans more than 40 countries. Our purpose is to create and deploy innovative solutions for cleaning and decontaminating people, equipment and buildings, while meeting the full life cycle requirements for any fire department. Hygenall products have been used for the past ten years by thousands of people everyday. Hygenall's five divisions make safety products that solve specific contamination problems for global manufacturers (including general industry), healthcare, government, retail, aerospace, oil & gas, military, law enforcement, research laboratories, marine, and first responders.

Our brand reflects the company's position as a global leader combining innovation, resourcefulness and experience to deliver safe and effective solutions.

What does "Full-Spectrum" mean? Contaminates can fall into three basic types: Cationic, Anionic and Nonionic. Unlike regular soap, which is best for anionic and nonionic, Hygenall's patent pending technologies have been formulated to remove all three types of contaminants, for Full-Spectrum decontamination.

FULL-SPECTRUM[®]

Carcinogens, Germs, Soot, Metals, Plastics, Drugs and more...

Hygenall[®] FieldWipes™

Skin Decon and Cleaning Wipes

Removes >99% of heavy metals, soot, plastic residue and germs.

Note 1: Hygenall FieldWipes do not contain Trisodium Phosphates, which are dangerous to First Responders because they may help transport toxins deeper into the skin layers and possibly into the bloodstream.

Note 2: FieldWipes do not contain alcohol or skin softener such as Aloe.

100% recyclable and made from 100% natural ingredients and 100% made in the USA! Cationic surfactant with pH balancing keeps skin moisturized and clean. **NO EDTA, NO SLS, NO TSP, NO ALCOHOL, NO ALOE VERA!**
24 - 15"x 25" Extra Large Towel Size.....P/N: FSHT5014

★ Hygenall FieldScrub
P/N: FSHT5014

Hygenall HandScrub
P/N: HHSP16

Hygenall HandScrub
P/N: HHSP64

What does "Full-Lifecycle" mean? Firefighters operate in unpredictable dynamic environments and a single product approach simply does not provide complete protection. That is why Hygenall products were designed to compliment each other and provide a firefighter Full-Lifecycle protection from the moment they arrive at the station...until they go home.

Suggested Station Deployment

Keep contaminants out of working and living quarters

P/N: FS45NRCN

45 Wipe Canister: Use in eating and meeting areas to keep hands clean and prevent "Toxic Hand-Off" between people and surfaces.

P/N: FSFHW8001G

Hand, Hair and Body Wash: Replaces all shower and hand soaps for Full-Spectrum Decon and Cleaning.

Wall Bracket P/N: GR01

P/N: HT60071Q

Surface Cleaning and Decon: Works on bathroom stalls, walls, fixtures and other areas where toxic chemicals and metals accumulate.

P/N: FWWM501

Refillable Wall-Mount 500 Wipe Dispenser: Mount on wall beside entryway between living quarters and vehicle bays and work areas.

P/N: HHSP64

Hand Scrub: Cleans and decontaminates heavily soiled hands from grease, paint, black oil, germs, and toxic chemicals.

P/N: HT9005G

Floor and Surface: Follow instructions for floor cleaning and decontamination.

Suggested Apparatus Deployment

Stay clean on-site as much as possible

P/N: HT60071Q

Surface Clean & Decon: Use to decon PPE and equipment on-scene.

P/N: DKS008

Refillable Decon Kit: Complete on-scene decontamination kit for 4 firefighters and 1 vehicle. **REFILLABLE!**

DDA Cones: Extra-large, high visibility cones used to designate a safe decon area. **FREE** with Certain Orders, Ask your dealer for details!

P/N: HDAC28

P/N: FSHT5014

P/N: FW902AFF

FieldScrub Towels & FieldWipe Singles: Stow in vehicles for personal cooling and non-rinse cleaning and decontamination.

P/N: HYHS201Q

GermaStat-Sanitizer: For mass sanitization of personnel. Helps prevent transferring germs from the scene and home. Non-Sticky! **REFILLABLE!**

Baby wipes are great for babies, but not Firefighters! Inexpensive soaps and baby-wipe type products are great for removing soot, but not for microscopic cancer-causing metals and chemicals. Modern fires emit more than hydrocarbons, including cationic chemicals and metals that stick to skin differently, which is why typical soaps and wipes are not very effective. Hygenall products are designed to displace, reduce and clean off chemicals and metals, including hydrocarbons found in soot. Hygenall products remove: arsenic, mercury, lead, cadmium, chromium, cobalt, antimony, manganese, beryllium, vanadium, dirty bomb residue, dioxins, furanes, pesticides, phthalates, plastic residue, drug residue, and others.

...to learn more, ask your dealer about attending an online Hygenall Firefighter Decon Seminar!

Suggested Firefighter Deployment

Stay clean on-site as much as possible

Hand, Hair and Body Wipes:

Individually wrapped wipes to clean hair, neck, face and hands.

P/N: FW902AFF

Extra-Large 8"x12" Wipe
Individually Wrapped
Alcohol Free

P/N: FW501NRDS

On-Scene Decon Station: Keeps refillable 500 count wipe supply off the ground, and provides a place to stow used wipes.

Non-Rinse Pocket Size Foaming Decon Soap:

Replaces pre-wetted hand-wipes, used to clean exposed skin including hands and face after removing PPE. Economical: replaces approximately 50 hand-wipes.

P/N: FWNR1701

P/N: FSHT5014

Emergency HAZMAT Decon: Pre-soaked body towel for on-scene full-body fast decontamination in heavy HAZMAT exposure situations, such as flooding, industrial fires, building collapse, or dirty bomb exposure. Can also be used to cool firefighters on a hot day, or heated in microwave or vehicle heater for cold days.

P/N: HHSP16

Rinse or Non-Rinse Hand Scrub:

Combination of Hygenall and pumice for heavy grease, oil and toxic substance decontamination.
