

Answering the Call for a non-PFAS System

1. Milliken Horizon™

Our innovative outer shell with the highest strength retention available. Colorfast and durable – blacks stay black and golds stay gold, even in the wash and after UV exposure.

2. Milliken Assure™

Milliken's new non-PFAS moisture barrier, which sets a new benchmark for heat, water, and chemical resistance, with exceptional breathability and durability.

3. Milliken Equinox™

A slick thermal liner with superior wicking and moisture management, resulting in quick dry times and high levels of comfort and protection.

With Assure, Milliken became the first and only U.S.-based manufacturer to offer a non-PFAS fabric for every layer of a firefighter's turnout gear. Fire departments and PPE committees now have the option to specify fully non-PFAS turnout gear coats and pants that provide firefighters the same levels of comfort, safety, durability and performance they depend on.

LIGHTER THAN TYPICAL TURNOUT COMBINATIONS

WHAT IS TECGEN71®?

An exclusive and patented Fire-Dex outer shell for structural firefighting that's designed to mitigate heat stress by reducing weight and increasing flexibility.

TECGEN71® features a ripstop twill weave, seamlessly blending the proven durability of DuPont™ Kevlar®/Nomex® with the unique advantages of the TECGEN fiber, and has no intentionally added PFAS.
