## GET THE RIGHT SIZE

### How to measure:

- 1. Chest/Bust:** With arms down at your sides, measure around the largest part of the chest, generally across the nipples.
- 2. Waist:** Measure around natural waistline, allowing tape measure to sit comfortably.
- 3. Inseam:** With feet shoulder-width apart, measure from just below your crotch to the bottom of your ankle.

### Tips for taking accurate measurements:

- It's best to have someone else help do the measuring.
- Use a cloth measuring tape. If you don't have one, use a cord (or an NRS strap!) and transfer that to a tape measure.
- Measure in your street clothes; we size technical outerwear pieces like dry suits and dry tops to include room for layering underneath.
- Stand up straight and relax.

### Suggestions on sizing when your measurements cross into different size categories:

- With wetsuits, your weight is the best "tiebreaker" when measurements cross sizes. Remember, wetsuits need to fit snugly to be efficient at excluding water and holding in warmth.
- In looser fitting garments like drysuits, splash jackets, etc, look first at the height, then at the weight for a tiebreaker.
- When you have questions about fit you can always give us a call at 877.677.7370, during business hours, or drop us a line at [rescue@nrs.com](mailto:rescue@nrs.com), to reach one of our friendly, experienced customer service folks.
