FORCIBLE ENTRY TOOL T1

T1

specifications		T1
art. no.		151.001.787
spreading distance	in.	5
max. spreading force	lbf	7,419
min. spreading force 25 mm tip	lbf	5,845
max. cutting opening	in	1.1
theoretical cutting force	lbf	31,248
round bar (S235)	in	0.7
weight, ready for use	lb	17

Multifunctional tool

- The T1 can hammer, cut, spread, lift, wedge and ram. This means you always have the right tool for the job.
- The wedge is detachable, meaning no second person or tool is needed for creating the first gap.
- Having all these functions in one tool also saves weight and space in your vehicle.
- The T1 is a stand-alone tool, so you won't need batteries or an external pump.

2-stage pump

- High power transmission means 30 kg of manual force on the pump rod gives you up to 14,2 ton hydraulic cutting force and up to 3,4 ton hydraulic spreading force.
- You will need less energy or breathing air, compared to traditional tools.

Compact and powerful

- The patented hydraulic cutting/spreading mechanism of the T1 allows for high cutting & spreading forces in a compact tool design.
- Easy to use in confined spaces.
- Easy to carry and store.

Optimized cutting blades and jaw design

- The T1 can easily cut rebar, chain and padlock.
- It can cut up to $\varnothing 18$ mm of round bar (S235).
- You can easily replace the cutting blades when they are damaged.

Spreading tips

- For opening heavy doors in a controlled way
- The load-holding function makes the tool suitable for lifting and progressive lifting
- You can also use the spreading tips to create space in vehicles.

Detachable Wedge

- You don't need a second person or tool for creating the first gap, which makes forcing heavy inward opening doors a one-person job.
- The wedge can also be used for pulling hinges or manually forcing outward opening doors.

Hammer head

- You can use the tool as a battering ram or hammer
- For opening light inward opening doors quickly
- The optimized weight of 7,7kg makes the tool light enough to carry and heavy enough to do the job

A close-up, first-person perspective shot of a firefighter using a Holmatro T1 hydraulic tool. The firefighter's gloved hand is visible in the foreground, holding the tool. The tool is positioned against a metal door frame, with its cutting head engaged in the metal. A black hydraulic hose is connected to the tool. The background shows a brick wall and a white door. The text "holmatro T1" is visible on the side of the tool.
